## What is this product?

**Type:** Shares of a Sub-Fund of MULTI UNITS LUXEMBOURG, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as a SICAV.

**Term:** The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

**Objectives:** The Fund is an index-tracking UCITS passively managed.

The investment objective of the Fund is to track both the upward and the downward evolution of the Solactive EUR USD IG Corporate Green Bond TR Index" (the "Index") denominated in EUR, in order to offer an exposure to investment grade rated Green Bonds denominated in EUR and USD issued by corporates, while minimising the volatility of the difference between the return of the Fund and the return of the Index (the "Tracking Error").

The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

The Index is representative of the performance of investment grade rated Green Bonds denominated in EUR and USD issued by corporates. Green bonds are issued in order to fund projects that have positive environmental outcomes. To be eligible in the Index, Green Bonds shall meet the criteria defined by the Climate Bonds Initiative, through a four-step process that includes: identification of environmentally themed bonds, reviewing eligible bond structures, evaluating the use of proceeds and screening eligible green projects or assets for adherence with the Climate Bonds Taxonomy.

More information can be found on the website: <http://www.climatebonds.net/> and <https://www.climatebonds.net/standard/taxonomy>.

The Index follows an extrafinancial approach significantly engaging that contributes to the energy and ecological transition by investing at least 90% of the net asset value of the Fund in Green Bonds comprising the Index. Limits of the methodology of the Index are described in the prospectus of the Fund through risk factors, such as the market risk linked to controversies. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete.

Assessment of sustainability risks is complex and may be based on ESG data which is difficult to obtain, incomplete, estimated, out of date and/or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed.

Solactive's website (<https://www.solactive.com/>) contains more detailed information about the Solactive indexes.

The Index is a total return index. A total return index calculates the performance of the index constituents on the basis that any coupons or distributions are included in the index returns.

The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Index.

To optimize the Index replication, the Fund may use a sampling replication strategy.

The potential use of these techniques is published on Lyxor's website: [www.lyxoretf.com](http://www.lyxoretf.com).

Updated composition of the Fund holdings is available on [www.lyxoretf.com](http://www.lyxoretf.com).

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

**Intended Retail Investor:** This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.

**Redemption and Dealing:** The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges. Only authorised participants (e.g., selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the MULTI UNITS LUXEMBOURG prospectus.

**Distribution policy:** As this is a non-distributing share class, investment income is reinvested. the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

**More Information:** You may get further information about the Sub-Fund, including the prospectus, and financial reports which are available at and free of charge on request from: Amundi Luxembourg S.A. at 5, allée Scheffer 2520 Luxembourg, Luxembourg.
