What is this product?

Type: Shares of a Sub-Fund of AMUNDI ETF II ICAV, an Undertaking for Collective Investments in Transferable Securities (UCITS), established as an ICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Sub-Fund is an actively managed Sub-Fund.

The Sub-Fund is actively managed by reference to and seeks to outperform (after applicable fees) the MSCI EMU Index (the "Benchmark") over a recommended holding period of at least 5 years without targeting a particular level of outperformance.

The Sub-Fund is mainly exposed to the issuers of the Benchmark, however, the management being discretionary, the Sub-fund will be exposed to issuers not included in the Benchmark. The Sub-Fund monitors risk exposure in relation to the Benchmark, however the extent of deviation from the Benchmark may be limited.

The Sub-Fund invests at least 75% of net assets in equities, issued by large and mid-cap companies across developed countries in the European Economic and Monetary Union. For the purposes of the Sub-Fund, "large and mid-cap" means companies included in the top 85% of each country's cumulative free-float-adjusted market capitalization as determined by MSCI. The Sub-Fund may also invest in other equities, including equities issued by small-cap companies or by companies across emerging countries, equity-linked instruments, deposits and, for up to 10% of net assets, in other UCITS and undertakings for collective investment ("UCI").

The Investment Manager will be able to use derivatives for hedging and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities financing transactions, including securities lending operations.

The investment process employs a combination of fundamental analysis and quantitative portfolio construction to identify companies with strong potential to outperform the Benchmark. Fundamental research focuses on companies demonstrating a competitive advantage, robust cash flow generation and attractive valuations, based on financial statement analysis, business model evaluation, assessment of competitive positioning and analysis of industry dynamics and growth prospects, with all equity positions taken on a long-only basis. In addition, the investment process is based on macroeconomic analysis (top-down) in order to identify countries and sectors that appear likely to offer the best risk-adjusted returns.

In certain market circumstances, such as where the correlation or volatility of the Sub-Fund's portfolio changes relative to the Benchmark, the management process may increase portfolio diversification and/or use derivatives for hedging and efficient portfolio management in order to manage the Sub-Fund's risk profile in relation to the Benchmark.

The Sub-Fund is classified as Article 8 under Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation"). The Sub-Fund seeks for its portfolio to achieve an ESG score greater than that of the Benchmark, without targeting a particular level of ESG outperformance. Environmental, social and governance (ESG) criteria are integrated into the investment process, without necessarily being a determining factor in each investment decision.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period with the ability to bear losses up to the amount invested.

Redemption and Dealing: The Sub-Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, you may deal in shares during the trading hours of the stock exchanges. Only authorised participants (e.g., selected financial institutions) may deal in shares directly with the Sub-Fund on the primary market. Further details are provided in the AMUNDI ETF II ICAV prospectus.

Distribution policy: As this is a non-distributing share class, investment income is reinvested. the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

More Information: You may get further information about the Sub-Fund, including the prospectus, and financial reports which are available at and free of charge on request from: Amundi Ireland Limited at AMUNDI IRELAND LIMITED, One George's Quay Plaza, George's Quay, Dublin 2, Ireland.

The Net Asset Value of the Sub-Fund is available on www.amundi.ie

Depository: HSBC Continental Europe.

What are the risks and what could I get in return?

RISK INDICATOR

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the AMUNDI ETF II ICAV prospectus.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Sub-Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

What you get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

What happens if Amundi Ireland Limited is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of AMUNDI ETF II ICAV. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 invested.
