AMF Classification ("Autorité des Marchés Financiers"): International equities

Objectives: By subscribing to Amundi MSCI World Climate Paris Aligned Umweltzeichen UCITS ETF you are investing in a passively managed UCITS whose objective is to replicate as closely as possible the performance of the MSCI World Climate Change Paris Aligned Low Carbon Select strategy index (the "Strategy Index") regardless of whether it experiences a positive or negative development. The maximum tracking error objective between the growth of the net asset value of the Fund and that of the Strategy Index, under normal market conditions, is specified in the Fund's prospectus. The total net return Strategy Index (i.e. accumulating interest), net dividends reinvested, denominated in US dollars, is calculated and published by the index provider. You are exposed to the currency risk between the currencies of the equities comprising the Strategy Index and the Fund's currency. You are not, however, exposed to currency risk between the currency of the Strategy Index and the currency of the Fund. More information on the composition and operating rules of the Strategy Index can be found in the prospectus and on msci.com. The Index is available via Bloomberg (MXWOPCNU). To replicate the MSCI World Climate Change Paris Aligned Low Carbon Select Strategy Index, the Management Company applies a "passive" type of management using the direct replication method which consists of investing in financial securities that are part of the MSCI World Climate Change Paris Aligned Low Carbon Select Strategy Index in proportions that are extremely close to those of the Index. To generate additional yield, the Fund may make collateralised temporary purchases and sales of securities. The UCITS has a greenhouse gas emission reduction objective within the meaning of Article 9 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (the "Disclosure Regulation"). The UCITS is subject to a sustainability risk as defined in the risk profile in the prospectus.

As a result, investors will pay brokerage charges and/or transaction charges on their transactions on the stock market. These brokerage charges and/or transaction charges are neither charged nor payable by the Fund or the Management Company, but by the investor's own intermediary. How long should I hold it and can I take money out early?

Recommended holding period: 5 years. This period is based on our assessment of the risk and reward characteristics and costs of the Fund. This product is designed for medium-term investment; you should be prepared to stay invested for at least 5 years. You can redeem your investment at any time, or hold the investment longer.

Order schedule: Information on the order frequency can be found under "What is this product?". Please refer to the section "What are the costs?" for more information on the exit costs. A redemption cap mechanism (known as a "gate") may be implemented by the Management Company. How it would be operated is described in the Prospectus.

In the primary market, the management company may:

- Suspend the redemption of units, if exceptional circumstances so require, taking into account the interest of investors.
- Manage liquidity risks by (i) limiting the number of units redeemed for a short period of time, if redemption requests reach a predefined threshold beyond which these requests can no longer be executed in the interest of all investors ("**Redemption Cap**"), and (ii) applying anti-dilution levies to the Fund to offset or reduce portfolio restructuring costs for the remaining investors.

On the secondary market, investors will generally be able to sell their shares on the relevant stock exchange. Additional details can be found in the prospectus.
